

# How to Use:

1. Zero the scale by ensuring the main slide ( 2 ) is at zero, then move zero adjustment slide ( 3 ) left or right until beams are level with base.
2. Place item(s) to be weighed in cup ( 1 ) and gently move main slide ( 2 ) until beams are level with base again.
3. If you need to increase capacity (default is 1g), place weights in the positions shown.

Capacity	4	5	6
